

What is Zoom-Bombing?

Zoom-bombing is an organized assault typically committed by anonymous, uninvited guests in a Zoom event who share their screens for the purposes of bombarding other attendees with disturbing images and content.

It typically takes the form of willful harassment, intimidation, and threat targeted at individuals from underrepresented or minoritized social groups based on race, ethnicity, nationality, gender, sexuality, and religion.

Zoom-bombing is a criminal act, and in some cases subject to federal charges.
